What is this product?

Type
The Sub-fund is part of ADQUANTID SICAV SIF SCA fund. The Fund is an investment company, qualifying as a "société d'investissement à capital variable – fonds d'investissement spécialisé". The Depositary is Quintet Private Bank (Europe) S.A.

Term
The investment horizon is medium term and should be at least 5 years.

Objectives
The Sub-Fund aims at capital appreciation over the medium to long-term while controlling the risks related to the assets classes by investing mainly in a selected portfolio denominated in Euro of international equity and equity-linked instruments (including but not limited to ordinary or preferred shares, convertibles bonds), bonds and debt securities and instruments of all types (including but not limited to fixed-rate or floating securities, zero-coupon bonds and treasury bonds).

Exposure to equity instruments will depend on the outlook of the financial markets and General Partner investment views (exposure to equity instruments may represent more than 50% of the net assets).

The choice of investments will neither be limited by geographical area nor economic sector. However, depending on financial market conditions, a particular focus can be placed in a single country and/or in a single economic sector. The Sub-Fund may achieve its investment objective indirectly, by investing through other UCIs/UCITS, including ETFs.

In the best interest of the Shareholders, and notably for defensive purposes, the Sub-Fund may also, hold, up to 100% of its net assets, liquidities such as (but not limited to) cash deposits, money market funds and Money Market Instruments.

Intended retail investor
The Fund is restricted solely to Well-Informed Investors such as institutional investors, Professional Investors and any other well-informed investor. Minimum Initial Investment: EUR 125,000.

What are the risks and what could I get in return?

Risk Indicator:

1	2	3	**4**	5	6	7

←——→
Lower risk   Higher risk

The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the fund is not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.
This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

Other risks: Credit risk, Liquidity risk, Counterparty risk, Operational risk, Derivatives risk, Currency risk, Event Risk.

This product does not include any protection from future market performance so you could lose some or all of your investment.

What happens if Adepa Asset Management S.A. is unable to pay out?

The investments of the fund are held separately from the assets of Adepa Asset Management S.A. as fund management company and from the corresponding custodian bank. Thus, you will not lose your investment in the event of a possible insolvency of Adepa Asset Management S.A.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- Investment: 10,000 EUR

Costs over Time	If you exit after 1 year	If you exit after 5 years
Total costs	783.63 EUR	2,121.41 EUR
Annual cost impact (*)	7.84%	4.05%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.19 % before costs and -0.85 % after costs.

Composition of Costs

The table below shows the impact if you exit after 1 year.

One-off costs upon entry or exit
