What is this product?

Type

The Sub-fund is part of A4 FUNDS SIF fund. The Fund is organised in and under the laws of the Grand-Duchy of Luxembourg as a mutual investment fund. This Fund is authorised and supervised in Luxembourg by the CSSF. The Depositary is Quintet Private Bank (Europe) S.A.

Term

The investment horizon is medium term and should be at least 3 years.

Objectives

The Sub-Fund is actively managed. The Sub-Fund aims at capital appreciation over the medium to long-term while controlling the risks related to the assets classes by investing mainly in a broadly diversified portfolio using a strategy with exposure to more alternative investments. The focus will be on Alternative Investment Funds ("AIFs") and depending on the outlook of the financial markets they may represent more than 50% of the net assets (but with a maximum of 75%). Exposure to equity and equity-linked instruments will diversify the portfolio and may represent 50% of the net assets, directly or through other UCIs/UCITS.

Exposure to AIFs will depend on the outlook of the financial markets and may represent more than 50% of the net assets (max. 75%). The choice of investments will neither be limited by geographical area nor economic sector. However, depending on financial market conditions, a particular focus can be placed in a single country and/or in a single economic sector. The focus will be on OECD countries, mainly the US and Europe.

For hedging and for investment purposes, the Sub-Fund may use all types of financial derivative instruments products traded on a Regulated Market.

Finally, the Sub-Fund may also invest in cash, deposits and money market instruments and money market UCIs or UCITS but will not use cash or money market instruments as part of the integral investment strategy. If the AIFM considers it in the best interest of the Unitholders, the Sub-Fund may also temporarily hold these investments up to 100% of its net assets.

Intended retail investor

The Fund is restricted solely to Well-Informed Investors such as institutional investors, Professional Investors and any other well-informed investor. This Sub-Fund is suitable for investors with high risk tolerance and risk capacity who would like to participate in a broadly diversified portfolio. Minimum Initial Investment: 250,000 EUR.

What are the risks and what could I get in return?

Risk Indicator:

The risk indicator assumes you keep the product for 3 years.

You may not be able to sell end your product easily or you may have to sell end at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the fund is not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class.

This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact our capacity to pay you.

Other risks: Credit risk, Liquidity risk, Counterparty risk, Operational risk, Derivatives risk, Currency risk, Event Risk.

This product does not include any protection from future market performance so you could lose some or all of your investment.

What happens if Adepa Asset Management S.A. is unable to pay out?

The investments of the fund are held separately from the assets of Adepa Asset Management S.A. as fund management company and from the corresponding custodian bank. Thus, you will not lose your investment in the event of a possible insolvency of Adepa Asset Management S.A.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- Investment: 10,000 EUR

Costs over Time	If you exit after 1 year	If you exit after 3 years
Total costs	713.19 EUR	1,102.88 EUR
Annual cost impact (*)	7.13%	3.92%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be -1.26 % before costs and -5.18 % after costs.

Composition of Costs

The table below shows the impact if you exit after 1 year.

One-off costs upon entry or exit
