What is this product?

Type

The Sub-fund is part of INCOMETRIC FUND, organized under the laws of the Grand Duchy of Luxembourg as a mutual investment fund. This Fund is authorised and supervised in Luxembourg by the CSSF. The Depositary is Quintet Private Bank (Europe) S.A.

Term

The investment horizon is medium term and should be at least 5 years.

Objectives

The Sub-Fund is actively managed. The objective of the Sub-Fund is to gain exposure to global equity markets by investing in shares of companies based on conducting the majority of their business activity in OECD countries, and emerging and frontier markets.

The Sub-Fund aims at achieving long-term capital appreciation by investing with a maximum exposure of 70% of the Sub-Fund's total net assets in emerging markets and frontier markets. Average exposure will probably be higher for developed markets than emerging and frontier combined, with a maximum exposure to developed markets of 100%.

Equity securities include common stock, preferred stock and securities convertible into common stock, and other securities with equity characteristics (which include any instrument tied to a specific security or basket of securities, certain options on common stock).

The Sub-Fund will seek to add value through stock selection based on a quantitative screening combined with a qualitative "bottom up" fundamental analysis with the goal of owning the highest quality growth companies that will best capture the strong expected growth in the emerging and frontier markets. The Sub-Fund is managed following a geographical as well as sectorial diversification, based on a value investing methodology combined with the presence of circumstantial catalysts undervalued by the markets.

The term "frontier markets" refers to those emerging market countries outside the "mainstream" emerging markets, whose capital markets have traditionally been difficult for foreign investors to enter or are in early or advanced stages of capital market and/or economic development.

Intended retail investor

Reserved for retail and Institutional investors denominated in EUR. The investment strategy corresponds for the investors with a medium to high investment risk profile. Minimum Initial Investment: EUR 20,000.

What are the risks and what could I get in return?

Risk Indicator:

The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the fund is not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class.

This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact our capacity to pay you.

Other risks: Credit risk, Liquidity risk, Counterparty risk, Operational risk, Derivatives risk, Currency risk, Event Risk.

This product does not include any protection from future market performance so you could lose some or all of your investment.

What happens if Adepa Asset Management S.A. is unable to pay out?

The investments of the fund are held separately from the assets of Adepa Asset Management S.A. as fund management company and from the corresponding custodian bank. Thus, you will not lose your investment in the event of a possible insolvency of Adepa Asset Management S.A.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- Investment: 10,000 EUR

Costs over Time	If you exit after 1 year	If you exit after 5 years
Total costs	175.19 EUR	1,204.14 EUR
Annual cost impact (*)	1.75%	1.75%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 9.15 % before costs and 7.40 % after costs.
