What is this product?

Type

The Sub-fund is part of LEVEL TWO INVESTMENTS fund. The Fund is a company established in the Grand Duchy of Luxembourg with a variable capital (société d'investissement à capital variable). The Depositary is Quintet Private Bank (Europe) S.A.

Term

The investment horizon is medium term and should be at least 3 years.

Objectives

The Sub-fund is actively managed. The investment objective of the Sub-Fund is to achieve capital protection and appreciation through investment in transferable securities, money market instruments and other legally acceptable assets.

The investment portfolio will consist of individual securities as well as UCITS/UCIs index funds, Exchange Traded Funds ETFs, Exchange Traded Notes (ETNs) and index futures. Index funds and ETFs will be used to obtain market exposure in specific markets or situations where such instruments are deemed more attractive than a selection of individual securities. In this way the use of index-oriented funds or ETFs does not represent a Fund-of-funds strategy but a means to obtain the desired asset allocation.

The Sub-Fund may invest in transferable debt securities including corporate bonds, government bonds, mortgage-backed securities (maximum up to 20% of net assets), fixed income instruments issued by sovereign borrowers or their agencies as well as other fixed income securities. For the debt securities in which the Sub-Fund may invest, at least 50% will be invested in debt securities of "Investment Grade" (commonly described as above BBB- for the long term according to Standard & Poor's scale), or deemed equivalent by the Investment Manager.

The Sub-Fund may also invest in equity and equity related securities. Under normal market conditions, the proportions of assets allocated by the Sub-fund to equities may vary between 20% and 60% of its net assets and the allocation to bonds may vary between 30% and 90% of its net assets.

Intended retail investor
