## What is this product?

### Type

The Sub-fund is part of BA<sup>3</sup> STRATEGIC INVESTMENT SICAV fund. The Fund is an open-ended investment company with variable capital, incorporated in the Grand Duchy of Luxembourg. This Fund is authorised and supervised by the CSSF. The Depositary is Banco Inversis S.A.

### Term

The investment horizon is medium term and should be at least 5 years.

### Objectives

The Sub-Fund is actively managed. The objective of the Sub-Fund is to gain exposure to global equity and fixed income markets by mainly investing through UCITS/UCIs including ETFs. The Sub-Fund is managed with a risk aware approach and is diversified across regions and sectors. The indirect maximum exposure to Russia and China through all the different fund investments is limited to 20% on China and 10% on Russia.

“Crescita equilibrata” (Balanced Growth) recalls the need for capital growth but with a balanced approach in terms of allocation, to which the Sub-Fund responds through a multi asset allocation with equity weight between 35% and 65%.

The Sub-Fund can invest with a global approach in the following asset types indirectly through UCI/UCITS including ETFs, such as shares/units in UCITS within the Fidelity Funds range of collective investment schemes within equities and fixed income (including high-yield bonds) and shares/units in exchange traded funds (ETF) within the Fidelity range.

The target indirect exposure of equities and fixed income is balanced most of the time. The Sub-Fund will invest indirectly in equity and fixed income markets in a balanced approach with the flexibility to tilt allocations according to market conditions and within the defined ranges of 35-65% for each asset group. At all times, the maximum exposure level to derivatives is capped at 100% of the Sub-Fund total net assets.

If the Investment Manager considers this to be in the best interest of the investors, and notably for defensive purposes, the Sub-Fund may also, hold, up to 20% of its net assets, in liquid assets such as (but not limited to) cash deposits, and/or Money Market Funds.

### Intended retail investor

Reserved for retail and institutional investors. The investment strategy corresponds for the investors with a medium investment risk profile. Minimum Subscription: 100.000 EUR.

## What are the risks and what could I get in return?

### Risk Indicator:

The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the fund is not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

Other risks: Credit risk, Liquidity risk, Counterparty risk, Operational risk, Derivatives risk, Currency risk, Event Risk.

This product does not include any protection from future market performance so you could lose some or all of your investment.

|                                                                       | Average return each year                             | 20.0 %                   | 6.4 %                     |
| <b>Worst case scenario</b>                                            | <b>You could lose some or all of your investment</b> |                          |                           |

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment between December 2021 and December 2022 (If you exit after 1 year), December 2021 and March 2025 (If you exit after 5 years).

Moderate scenario: This type of scenario occurred for an investment between January 2020 and January 2021 (If you exit after 1 year), June 2015 and June 2020 (If you exit after 5 years).

Favourable scenario: This type of scenario occurred for an investment between March 2020 and March 2021 (If you exit after 1 year), October 2016 and October 2021 (If you exit after 5 years).

## What happens if Adepa Asset Management S.A. is unable to pay out?

The investments of the fund are held separately from the assets of Adepa Asset Management S.A. as fund management company and from the corresponding custodian bank. Thus, you will not lose your investment in the event of a possible insolvency of Adepa Asset Management S.A.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- Investment: 10,000 EUR

| Costs over Time        | If you exit after 1 year | If you exit after 5 years |
|------------------------|--------------------------|---------------------------|
| Total costs            | 120 EUR                  | 473 EUR                   |
| Annual cost impact (*) | 1.2 %                    | 0.8 %                     |

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.7 % before costs and 3.9 % after costs.

## Composition of Costs

The table below shows the impact if you exit after 1 year.

| One-off costs upon entry or exit                            |                                                                                                                                                                                                                               |        |
|-------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Entry costs                                                 | 0.5 % of the amount you pay in when entering this investment. This is the maximum amount you could pay and it could be less.                                                                                                  | 50 EUR |
| Exit costs                                                  | We do not charge an exit fee for this product, but the person selling you the product may do so.                                                                                                                              | 0 EUR  |
| Ongoing costs (taken each year)                             |                                                                                                                                                                                                                               |        |
| Management fees and other administrative or operating costs | 0.7 % of the value of your investment per year.                                                                                                                                                                               | 67 EUR |
| Transaction costs                                           | 0.0 % of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell. | 3 EUR  |
| Incidental costs taken under specific conditions            |                                                                                                                                                                                                                               |        |
| Performance fees                                            | There is no performance fee for this product.                                                                                                                                                                                 | 0 EUR  |

## How long should I hold it and can I take money out early?

### Recommended holding period: 5 years

This fund has no minimum holding period, but has been created for long term investment. You should therefore be prepared to remain invested with your investment for at least 5 years. However, you can return your investment on any bank business day in Luxembourg.

## How can I complain?

If you wish to make a complaint about this fund or about the person who sold you this fund or advised you about this fund, you can do so as follows:

**By phone:** you can make your complaint on the phone number +352 26 89 80 - 1.

**E-mail or by mail:** You can make your complaint via e-mail to [infocenter@adepa.com](mailto:infocenter@adepa.com) or by mail to Adepa Asset Management S.A., 6A rue Gabriel Lippmann, L-5365 Munsbach.

**Website:** You may address your complaint to us on our website "[www.adepa.com](http://www.adepa.com)" in the "Contact" section.

## Other relevant information

This chart shows the fund's performance as the percentage loss or gain per year over the last 4 years. Past performance is not a reliable indicator of future performance. Markets could develop very differently in the future. It can help you to assess how the fund has been managed in the past.

Performance is shown after deduction of ongoing charges. Any entry and exit charges are excluded from the calculation. The share class shown has been launched on 26 November 2020. The historical performance was calculated in EUR.

The monthly calculations of previous performance scenarios can be found under [https://www.adepa.com/priip-files/LU2207643383\\_scenario\\_export.csv](https://www.adepa.com/priip-files/LU2207643383_scenario_export.csv)
