What is this product?

Type

The Sub-fund is part of A4INVESTMENTS SICAV SIF fund. The Fund is an investment company established as a "société d'investissement à capital variable – fonds d'investissement spécialisé". This Fund is authorised and supervised in Luxembourg by the CSSF. The Depositary is Quintet Private Bank (Europe) S.A.

Term

The investment horizon is medium term and should be at least 5 years.

Objectives

The Sub-Fund is actively managed. The Sub-Fund aims at capital appreciation over the medium to long-term while controlling the risks related to the assets classes by investing mainly in a selected portfolio denominated in U.S Dollars of ETFs, ETNs, equities, VIX futures, options on ETFs, options on ETNs, bonds and debt securities and instruments of all types (including but not limited to fixed-rate or floating securities, zero-coupon bonds and treasury bonds). The Sub-Fund will have a focus (minimum 30 % of total net assets) throughout the healthcare industry and in particular within the biotechnology, generic pharmaceuticals, large pharmaceuticals, specialty pharmaceuticals and medical devices sub-sectors, across geographies and market capitalisations.

Investment decisions are made by a dedicated team of experienced professionals with relevant scientific and financial backgrounds. The Sub-Fund uses a set of rules that may advice to profit from situations of extreme stress in the financial markets. In those cases the Sub-Fund will enter positions that benefit from decreases in equity prices and increases in market volatility.

Exposure to equity and futures instruments will be dictated by a set of rules predefined by the fund managers (exposure to equity instruments may represent more than 50% of the net assets). Those rules are based on analyzing the current conditions and interfering how the financial assets will evolve. The rules are constantly scrutinized to find new factors that affect the markets.

Capital gains are aimed to be obtained by having exposure in equity markets and indices volatility products and it is intended to give the Investment Manager maximum flexibility to invest the assets of the Sub-Fund to achieve the highest possible return to the investors, in light of the Sub-Fund's investment objective and policy and within the limits set by in the offering document.

What are the risks and what could I get in return?

Risk Indicator:

The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the fund is not able to pay you.

We have classified this product as 6 out of 7, which is the second-highest risk class.

This rates the potential losses from future performance at a high level, and poor market conditions are very likely to impact our capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks: Credit risk, Liquidity risk, Counterparty risk, Operational risk, Derivatives risk, Currency risk, Event Risk.

This product does not include any protection from future market performance so you could lose some or all of your investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- Investment: 10,000 USD

Costs over Time	If you exit after 1 year	If you exit after 5 years
Total costs	521.00 USD	1,233.44 USD
Annual cost impact (*)	5.21%	5.21%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be -14.48 % before costs and -19.69 % after costs.
