Exposure to all eligible investments can be direct or indirect through the use of UCITs or UCIs (including ETFs) or derivatives.

The Sub Investment Manager will use MSCI ACWI Index for the purpose of investment selection, risk monitoring, and performance comparison. MSCI ACWI Index does not take into account ESG characteristics. When monitoring risk, the Sub-Investment Manager may reference the Index for the purpose of setting internal guidelines. These guidelines represent overall levels of exposure relative to the Index.
