What is this product?

Type

The Sub-Fund is part of ALTEX fund. The Depositary is Quintet Private Bank (Europe) S.A.

Term

The investment horizon is medium term and should be at least 3 years.

Objectives

The Sub-Fund aims to generate long term capital appreciation and preservation by actively managing the portfolio's beta exposure through a concentrated portfolio of asset classes with different beta characteristics, while seeking to contain volatility and risk with complementary investment and beta hedging strategies.

The Sub-Fund will invest mainly, either directly or through derivatives (including futures, options both listed and OTC), in equity indices and equity related instruments, volatility (that is, the CBOE Volatility Index (VIX), a real-time index representing the market's expectations for the relative strength of near-term price changes of the S&P 500 Index (SPX)) and volatility (VIX) related instruments (such as options and futures), dividend related instruments, corporate and government bonds and debt-related securities, ETFs (Exchange Traded Funds, that is, a basket of securities that trades on an exchange just like a stock does) and ETNs (Exchange Traded Notes, that is, unsecured debt security that track an underlying index of securities).

The investment management team will combine quantitative and discretionary analysis techniques to obtain a superior risk-adjusted exposure to risk assets over a full business cycle. Exposure to risk assets will be highly flexible and adaptative to market risk assessment.

Intended retail investor

Class of Shares A is open for subscriptions by both retail investors and Institutional Investors, Professional Investors and investors receiving advisory services or discretionary investment management services as defined by the MiFID II Directive, and having separate fee arrangements in relation to those services and activities.

What are the risks and what could I get in return?

Risk Indicator:

The risk indicator assumes you keep the product for 3 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the fund is not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks: Credit risk, Liquidity risk, Counterparty risk, Operational risk, Derivatives risk, Currency risk, Event risk.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance-Scenarios:

Recommended holding period: 3 years Example Investment: 10,000 USD		If you exit after 1 year	If you exit after 3 years
Stress scenario	What you might get back after costs	5,600 USD	5,880 USD
	Average return each year	-44.0 %	-16.2 %
Unfavourable scenario	What you might get back after costs	8,120 USD	8,210 USD
	Average return each year	-18.8 %	-6.3 %
Moderate scenario	What you might get back after costs	10,680 USD	11,970 USD
	Average return each year	6.8 %	6.2 %
Favourable scenario	What you might get back after costs	12,700 USD	14,750 USD
	Average return each year	27.0 %	13.9 %
Worst case scenario	You could lose some or all of your investment		

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment between September 2021 and September 2022 (If you exit after 1 year), December 2021 and December 2024 (If you exit after 3 years).

Moderate scenario: This type of scenario occurred for an investment between July 2017 and July 2018 (If you exit after 1 year), March 2020 and March 2023 (If you exit after 3 years).

Favourable scenario: This type of scenario occurred for an investment between March 2020 and March 2021 (If you exit after 1 year), December 2018 and December 2021 (If you exit after 3 years).

What happens if ALTEX Asset Management S.G.I.I.C. S.A. is unable to pay out?

The investments of the fund are held separately from the assets of ALTEX Asset Management S.G.I.I.C. S.A. as fund management company and from the corresponding custodian bank. Thus, you will not lose your investment in the event of a possible insolvency of ALTEX Asset Management S.G.I.I.C. S.A.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- Investment: 10,000 USD

Costs over Time	If you exit after 1 year	If you exit after 3 years
Total costs	230 USD	795 USD
Annual cost impact (*)	2.3 %	2.3 %

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 8.5 % before costs and 6.2 % after costs.

Composition of Costs

The table below shows the impact if you exit after 1 year.

One-off costs upon entry or exit		
Entry costs	We do not charge an entry fee.	0 USD
Exit costs	We do not charge an exit fee for this product, but the person selling you the product may do so.	0 USD
Ongoing costs (taken each year)		
Management fees and other administrative or operating costs	1.8 % of the value of your investment per year.	180 USD
Transaction costs	0.5 % of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	50 USD
Incidental costs taken under specific conditions		
Performance fees	The Performance fee is 10 % of any returns that, subject to a high water-mark, the Sub-Fund achieves above the highest historical NAV at year end of the previous 5 years. Further details are available in the Prospectus. The actual amount will vary depending on how well your investment performs. The aggregated cost estimation above includes the average over the last 5 years.	0 USD

How long should I hold it and can I take money out early?

Recommended holding period: 3 years

This fund has no minimum holding period, but has been created for medium term investment. You should therefore be prepared to remain invested for at least 3 years. However, you can redeem your investment on any bank business day in Luxembourg.
