What is this product?

Type

The Sub-fund is part of BEKA LUX SICAV fund. The Fund is a Luxembourg open-ended investment company established as a société d'investissement à capital variable formed as a société anonyme. The Depositary is BANCO INVERDIS, S.A.

Term

The investment horizon is medium term and should be at least 5 years.

Objectives

The Fund is actively managed without reference to any benchmark. The fund will invest at least 85% of its total exposure directly and indirectly in equities. The Sub-Fund will also invest directly and indirectly in public and/or private fixed-income assets, as well as whether listed or not, that are liquid and of high credit quality (minimum A- by the main credit rating agencies S&P, Moody's and Fitch) and with an average fixed-income portfolio duration of between 0 and 8 years. The Sub-Fund will invest as well in CoCos (contingent convertible instruments) with a maximum exposure of 15% of its net assets as well MBS and ABS with a minimum rating BBB, with a maximum combined exposure of 20% of its net assets.

For both Equity and Fixed Income, issuers/markets will be from OECD countries. The Sub-Fund may have up to 10% of total exposure to emerging countries securities. Emerging countries are any country not part of the list of developed country as per MSCI classification.

Issuers may belong to any sector, and the equity issuers will be of medium and large capitalization. The Sub-Fund will invest in quality companies with robust and sustainable business models, based on lasting competitive advantages, industry leadership positions, excellent management teams, superior returns on invested capital above the cost of capital, growing and recurring profits, high cash flow generation capacity, and low debt levels, with a solid debt structure, both gross and net relative to their EBITDA, depending on their industry.

Intended retail investor

Open to all type of investors. Typical investors in the Fund will be investors who are looking for an investment opportunity in a professionally managed investment fund with an investment objective of capital growth, income and/or portfolio diversification.

What are the risks and what could I get in return?

Risk Indicator:

The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the fund is not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

Other risks: Credit risk, Liquidity risk, Counterparty risk, Operational risk, Derivatives risk, Currency risk, Event Risk.

This product does not include any protection from future market performance so you could lose some or all of your investment.

What happens if ANTA ASSET MANAGEMENT SGIIC SA is unable to pay out?

The investments of the fund are held separately from the assets of Adepa Asset Management S.A. as fund management company and from the corresponding custodian bank. Thus, you will not lose your investment in the event of a possible insolvency of Adepa Asset Management S.A.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- Investment: 10,000 EUR

Costs over Time	If you exit after 1 year	If you exit after 5 years
Total costs	167 EUR	1,196 EUR
Annual cost impact (*)	1.7 %	1.7 %

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 10.4 % before costs and 8.8 % after costs.
